

FeedMAX Series

Increased feeder capacity helps to eliminate overhead costs

FeedMAX

Perfect for feeding magazines, self-mailers, postcards and other product types, the FeedMAX has all the characteristics of a high-end Sure-Feed feeder which includes: Patented Dynamic Rotation Technology, “The Shaker” plate, keeping product square while helping to increase separation, heavy duty 1/4” thick powder coated side frames, product guides, remote stop, external run interface and variable speed control.

The adjustable autoloader portion of the FeedMAX comes standard with the 6’ autoloader (9’ optional). Product guides, variable speed, casters and an independent power switch are all included.

FeedMax-S

The FeedMAX-S is designed to eliminate feedable product range and stack height limitations by shingling material on a high capacity conveyor that cascades into the feeder hopper. The FeedMAX-S combines a jogging wedge with Dynamic Rotation Technology to increase productivity by three times.

The FeedMAX-S comes standard with Sure-Feed’s Patented Dynamic Rotation Technology, “The Shaker” plate, 6’ autoloader (9’ optional), External Run Interface and Casters.

FeedMAX

FeedMAX Series Advantages

- > Return on Investment within 3-4 months
- > Straight and right angle capabilities
- > Increase production on shuttle bases
- > Improve product handling
- > Reduce labor costs

Applications

FeedMAX – continuous feed applications on in-line bases

FeedMAX-S – Uses registration table to bypass built in shuttle feeder bases for continuous feed applications

FeedMAX Series
