

Vacuum Transport Conveyors Compact Mail Table

Overview

The NEW Compact Mail Table provides mailers with a compact, roll-around vacuum table that can be used throughout the production area for inline camera inspection, bar code reading, addressing, printing, tipping, labeling, and more. The adjustable height base allows it to be used inline with most all mailing equipment in the market today including inserters, tabbers, inkjet systems, and more. The heavy-duty construction will provide years of service with minimal maintenance. An optional keyboard/monitor stand is available. For offline projects, small and large format friction feeders are available for product feeding.
