Inkjet Control Software

The Best Variable System for
100s of Presses Worldwide

Finally, a UV inkjet system that fits perfectly on your press, vacuum conveyor, or rewinder and can now be made PORTABLE! Hawk M6 is the latest generation of high resolution DOD print technology from Digital Print, Inc. (DPi). The system is expandable from 2.1" to over 17" with multiple print heads.

The Hawk M6 uses Kyocera's or Ricoh's advanced print head technologies. These robust and reliable print heads are designed for a broad range of industrial and commercial printing applications. They easily support such applications as labels, forms, direct mail, tickets, gaming, promotions, tags, and pharma packaging.

At DPi we create a strategic bond between you and your customer through our latest innovations with variable data technology and our universal controller that will create a revenue stream for years to come!

Wide Inkjet Heads

M6 ADVANTAGE

APPLICATIONS

READ & PRINT / CARD ATTACHING

• TICKETS, TAGS & LABELING

DIRECT MAIL ADDRESSING

• VERSIONING

PACKAGING

• FOIL APPLICATIONS

• SECURITY PRINTING

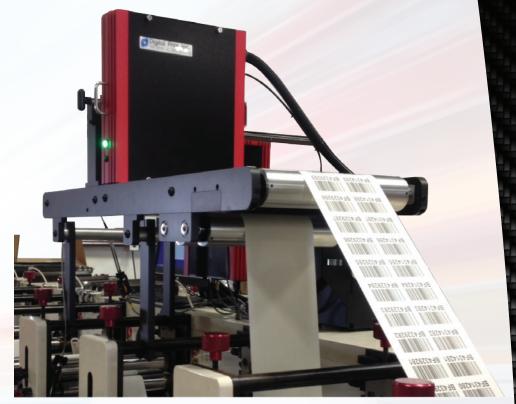

• PHARMACEUTICAL

• PLASTIC CARD PRINTING

The system utilizes the latest 30 kHz print module with lightning fast data transfer and print speeds.

- One ink for coated (UV/AQ), non coated or plastic stocks
- Automated maintenance / service features
- Sharp crisp text and barcodes with 1200 dpi quality
- High capacity 5 liter & 20 liter ink supply
- Spot colors can be changed easily
- QPressTM software for minimizing your layout time
- Duplex print with our custom press mount
- Move system to a second press as needs change

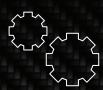

PRINT HEAD FEATURES

- 600 dpi across the head, (1200 to 200 dpi in direction of travel)
- Cover more than 17" of variable print with multiple head combinations
- Adjustable drop size and shaving for highest barcode readability
- UV curable or water based ink available
- Internal filters eliminate contaminants from the ink
- Internal heaters minimize the impact of external temperature changes
- Head cap and automated service mode reduce maintenance and increase print quality

VERSATILE / LOW COST UV INK

Inkjet print on a wide range of paper and coated gloss stocks at high production speeds. Virtually double your productivity on 11 x 6 self mailers or postcards by rotating the address and running long edge leading. Ink cost is nearly 90% less than using cartridge based systems. Contact DPi for a complete cost justification based on your

CUSTOM SOLUTIONS

Let our 30+ years of industry proven experience give you the competitive edge by providing a turnkey system designed specifically for your press. All systems include installation, custom press mounts, onsite training, and application support. Custom software programming is also available for unique applications.

INKJET CONTROL SYSTEM

- Standard Windows Based PC
- Interface to read and print system
- Initialize QPress, DPi legacy, or pdf iobs*
- System setup and service
- Monitor job progress
- Remote monitoring with smart phone
- Estimate ink usage

QPress LAYOUT SOFTWARE

Your more difficult job layouts are a snap with our user friendly software.

- Optimize layout for cut sheet or web
- Step and repeat tools built in
- Easily apply variable data, barcodes or graphics
- Numbering, barcoding, serialization
- Text, graphic, and barcode rotation
- Barcode shaving for improved quality (material with high dot gain)
